Mumbai, Maharashtra

EDUCATION

- **MIT World Peace University** Pune, Maharashtra
B.Tech. in Computer Science (AI & Data Science) Jun 2022 – Jul 2026

EXPERIENCE

- **Intern/Founder – GST Autopilot** Mumbai, India
GST Compliance Automation SaaS Dec 2025 – Present
 - Founded and built GstAutoPilot.com, an AI-powered GST compliance and return-filing platform focused on automating reconciliation, filing, and compliance workflows for Indian businesses.
 - Designed end-to-end backend architecture using Node.js, PostgreSQL, and automation pipelines to reduce manual GST filing effort by over 60%.
 - Implemented AI-driven mismatch detection, notice risk scoring, and compliance insights using rule engines and LLM-based analysis.
 - **Tech Stack:** Node.js, PostgreSQL, Prisma, Redis, Docker, AI Agents, LLMs.
- **Software Development Engineer – LawxyAI - Volody Products** On-Site
AI, Data Engineering, Full Stack Development Jan 2026 – Present
 - Led end-to-end development of LawxyAI.com: built ETL pipelines for 30+ Indian courts, developed FastAPI backend, React (Next.js) frontend, and deployed on **AWS (EC2, S3, RDS, Lambda)**.
 - Developed complex **AI-powered legal modules** (Research, Document Q&A, Drafting, Case Analyzer) using **LLM orchestration, RAG pipelines, and real-time web search**.
 - Built a **personalized sales outreach automation system** using LangGraph, n8n, and Playwright, enabling end-to-end lead generation to conversion.
 - Engineered a **multi-platform content automation system** generating and publishing real-time content across LinkedIn, X, and Medium using cron-based pipelines and LLMs.
 - **Tech Stack:** Python, FastAPI, Next.js, React, LangGraph, n8n, LLM APIs, RAG, PostgreSQL, Docker, **AWS (EC2, S3, RDS, Lambda)**.

PROJECTS

- **PMS Backend System - Legal Property Workflow Platform** Dates (e.g., Mar 2025 – Present)
 - Architected and maintained a FastAPI backend for property and legal document processing, handling authentication, document OCR, court data scraping (Maharashtra IGR), and multi-format report generation (LSR, SCR, SR).
 - Designed async OCR pipeline with Celery, Redis, and S3, supporting PDF, image, and DOCX uploads with real-time progress streaming and verification workflows.
 - Built nationwide court data ETL (30+ courts) — extracted causelist and metadata from PDFs, JSON, text; transformed into structured PostgreSQL tables for a litigation management system.
 - Integrated SSO (Google, Microsoft, LinkedIn), JWT-based entitlements, and WOPI for editable report artifacts; reduced document verification time by 35%.
 - **Tech Stack:** FastAPI, Python, PostgreSQL, Redis, Celery, S3, OpenAI API, Tesseract OCR, SSO, WOPI, Docker, AWS (EC2/RDS).
- **AI Tutor: Voice-Interactive Learning Platform** Jan 2024 – Present
 - Built voice-interactive AI tutor with speech, reasoning, and whiteboard visualization, improving learner engagement by 40%.
 - Engineered Neo4j knowledge graph with adaptive learning paths based on learner performance.
 - **Tech Stack:** Python, Flask, React, Neo4j, VAPI, ElevenLabs, LangChain.
- **Workload Spike Prediction & Auto-Scaling System -Mitsubishi[Industry Project]** Jan 2025 – Feb 2025
 - Built time-series forecasting and anomaly detection system reducing false positives by 35%.

- Deployed containerized pipeline with real-time monitoring dashboards.
- **Tech Stack:** Python, Kubernetes, Prophet, Docker, Grafana.
- **End-to-End Personalized Sales Outreach Automation** *Jan 2025 – Feb 2025*
 - Delivered complete backend + frontend system in one week: LLM-orchestrated personalized outreach across LinkedIn and email.
 - Used Playwright for automated LinkedIn connection requests and follow-up messages; integrated n8n for workflow orchestration.
 - Successfully converted leads into paying clients through hyper-personalized sequencing.
 - **Tech Stack:** Python, FastAPI, React, n8n, Playwright, LLM Orchestration, LinkedIn Automation.
- **Multi-Platform Content Automation (LinkedIn, X, Framer, Medium)** *Feb 2025 – Mar 2025*
 - Built full-stack system in one week that fetches real-time news via cron jobs and generates platform-personalized content.
 - Used LLM orchestration to adapt tone, format, and length per platform (LinkedIn, X, Framer, Medium).
 - Automated posting schedule, reducing manual content effort by 90%+.
 - **Tech Stack:** Python, FastAPI, React, Cron Jobs, LLM Orchestration, Multi-Platform APIs.
- **Nationwide Court Data ETL Pipeline (30+ Courts)** *Mar 2025 – Present*
 - Extracted complete caselist data and metadata from 30+ courts (High Courts, Supreme Court, District Courts across India) — PDFs, JSON, text.
 - Built end-to-end ETL pipeline: scraped heterogeneous sources, transformed into clean structured data, and loaded into PostgreSQL.
 - Powered a litigation management system with unified search and analytics across all court data.
 - **Tech Stack:** Python, Web Scraping (PDF/JSON/Text), ETL Pipelines, PostgreSQL, Litigation Management Integration.

ACHIEVEMENTS & HACKATHONS

- **BITS Pilani National Hackathon – Winner:** Built the most optimum end-to-end solution prototype in 36 hours among 100+ teams participating from all over the country.
- **Student Achiever Award – MIT World Peace University:** Recognized for outstanding academics, innovative project works, and broad involvement in social and extracurricular activities among a graduating class of 322 students.
- **Meritorious Student Award – NIT Goa:** Recognized as meritorious student among 200+ participants in the immersive program on Machine Learning and Deep Learning.

SKILLS

- **Languages:** Python, SQL, C++
- **Backend & DevOps:** FastAPI, Flask, REST APIs, Docker, Kubernetes, CI/CD, Git, AWS (EC2, S3, RDS, Lambda)
- **AI/ML:** LLM Orchestration, RAG, LangChain, LangGraph, Transformers, Fine-tuning (LLMs/SLMs), Prompt Engineering, AI Agents
- **Data Engineering:** ETL Pipelines, Web Scraping, Data Processing, PostgreSQL, MongoDB, Redis
- **Tools & Analytics:** Pandas, NumPy, Power BI, n8n, Playwright, Grafana
